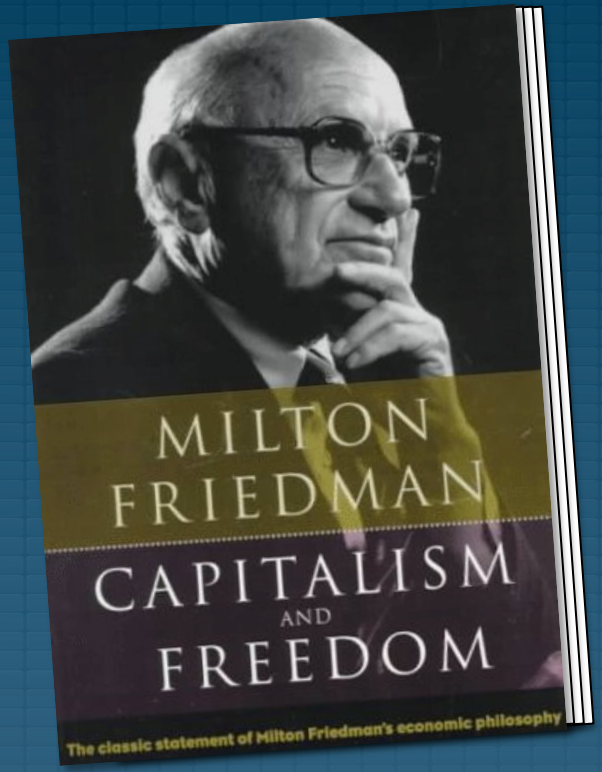
Guiding Principle



Republican Policy Goal

Promote economic growth by fostering the deepest, most liquid, competitive, efficient, innovative, and transparent capital markets the world has ever known

Legislative Priorities

- Reduce the volume, weight complexity and uncertainty of the red tape burden facing financial institutions, much of which is imposed by Dodd-Frank

Legislative Priorities

- Gradually transition to a private competitive mortgage market by winding down Fannie Mae and Freddie Mac, reforming the Federal Housing Administration (FHA) and ensuring federal low income housing programs promote opportunity rather than dependency

- Redirect the Federal Reserve to a predictable, rules-based monetary policy that ensures long-term price stability and clarifies the lines between fiscal and monetary policy
